

Up to 3 PhD positions at Umeå University

Umeå University announces up to 3 PhD Students within the Wallenberg Autonomous Systems and Software Program (WASP), in the areas of human-computer interaction and machine learning.

WASP is Sweden's largest individual research program ever, and provides a platform for academic research and education, fostering interaction with Sweden's leading technology companies. The program addresses research on autonomous systems acting in collaboration with humans, adapting to their environment through sensors, information and knowledge, and forming intelligent systems-of-systems.

Umeå University is now offering up to 3 PhD positions in three projects further described here: <http://www.cs.umu.se/wasp/phdstud2017/>. This offering is part of a joint effort among the WASP partners, see <http://wasp-sweden.org/wasp-announces-22-phd-student-positions/> for details.

For further information, please contact the project leaders or Kai-Florian Richter at kai-florian.richter@umu.se
