

Postdoctoral Position, Visual Thinking Lab, Northwestern University

Announcing an NSF-funded postdoctoral position in Dr. Steven Franconeri's Visual Thinking Lab at Northwestern University. The research project connects research on capacity limits of visual attention & memory to chemistry education. Ph.D.s in visual or spatial cognition, chemistry education, or related fields, are all welcome to apply. Strong experimental design, statistical analysis, and programming ability are all required. Some experience in chemistry, or willingness to learn, is a plus. Applications from female and under-represented candidates are strongly encouraged. The start date is flexible, from immediately to Fall 2017, and the position is for one year with the possibility of more. Please send a CV and contact information for three references ASAP to franconeri@northwestern.edu
